

Name _____ Date _____

Late in the summer, Sarah and her friend Aditi explore the well-drained grassland in a neighborhood natural park that is enclosed by mature trees. While returning home, Aditi noticed a Cinnabar moth caterpillar crawling on her clothing. Sarah carefully lifts the caterpillar from Aditi’s sock and places it on the apple tree in her yard.

What do you think might happen to the caterpillar? Circle your answer.

- A. It will stay on the apple tree and eat the leaves.
- B. It will try to find its way back to the park.
- C. It will not live in this habitat.

I believe that the caterpillar will _____
_____ because _____

_____.
